Placement goal decisions are based upon the significance of a one-tailed exact Binomial test. A goal is set if the p-value of said test is less than or equal to 0.1, a level of statistical significance. The establishment of a 'placement goal' does not amount to an admission of impermissible conduct. It is neither a finding of unlawful discrimination nor a finding of lack of good faith affirmative action efforts. Nor does the establishment of a placement goal permit unlawful discrimination. Rather, the establishment of a 'placement goal' is a technical targeting term used exclusively by affirmative action planners who seek to apply good faith efforts to increase, in the future, the percentage utilization of minorities and women in a work force.
